■ ■ GATC Biotech takes care of your samples

It all starts with the GATC Team. Dedicated people stand behind your results throughout the whole process.

GATC Biotech translates your samples into top-quality data.

A highly skilled and experienced team works round-the-clock to take immediate care of your samples.

We value on-time delivery. It is not just about getting a sample to our lab and to the sequencer. It is about establishing an individual logistics solution.

Our online platform *myGATC* allows for easy sample management, status updates and data downloads – at any time.

Benefit from 25 years of expertise and innovation.

GATC Biotech – your guarantee for successful sequencing

GATC Biotech additionally provides various standardised and ISO 17025 accredited next generation sequencing (NGS) solutions.

Visit www.gatc-biotech.com to learn more about our diverse product portfolio for applications, including exome and whole genome sequencing as well as transcriptome, microbiome and epigenetic studies. Also discover maximum flexibility with **NGSELECT™**, our modular NGS service.

SANGER SERVICES

Send your samples to:

GATC Biotech AG
European Custom Sequencing Centre
Gottfried-Hagen-Straße 20
51105 Cologne, Germany

Sequencing Solutions

More knowledge. More experience. More service.

Why choose GATC Biotech for your Sanger sequencing?

- High-quality read lengths of up to 1,100 nt in Phred20
- Free sample collection, e.g. local GATC Collection Points
- Data delivery within hours, fastest possible service with NightXpress™
- Barcode system for unambiguous sample identification in our fully automated laboratories
- Easy ordering and secure data download from your personal myGATC account
- Additional services, like DNA isolation or SNP and InDel analysis, can be ordered separately
- ISO 17025 accredited sequencing available upon request

Sanger sequencing in tubes and plates

LIGHTRUN SUPREMERUN

Specifications		
Starting material	Plasmids and PCR fragments	
	Plasmids and PCR fragments	Plasmids, PCR fragments, BAC, PAC, cosmids and ready-to-load reactions
DNA and primer	Premixed	Separate
Sample amount	Only 5 µl template DNA required	20 µl each (template DNA and primer); for up to 8 reactions
Read length	Up to 1,100 nt in Phred20	
NightXpress availability	Europe-wide	Selected cities only
Delivery time	Results available the next business day upon sample receipt	
NightXpress delivery	Between 8 am -1 pm the next business day after sample drop-off	Between 8 am -11 am the next business day after sample drop-off

GATC Service		
Online barcode order	■	■
Online sample tracking	■	■
Online data archive with 12 months data access	■	■
Purification		Plasmids, PCR fragments, BAC, PAC and cosmids
Adapted protocol for difficult samples free of charge (GC-rich sequences, hairpins, etc.)		■
Repetition of sequencing runs free of charge		■
Storage of samples and primers for re-use		10 days
ISO 17025 accredited sequencing upon request		■
Shipping aids		GATC Böxle™
Support	Multilingual website	Multilingual website, Hotline (Monday to Friday 8 am – 6 pm)
