Cholangioscopy System

Cholangio-Pancreatico-Scope
Mother-Baby Technique
2 Working Channels

Optical system:

Image transmission: 6000 pixel
Direction of view: 0°, direct view
Field of view: 70°
Integrated fiberoptical illumination, illumination depth more than 4 cm

Catheter:

Outer diameter: 3.00 mm, 30 cm of distal end fully flexible, tapered towards the proximal end for highest stability
Working length of scope: 180 cm
Length of optical system from handle to ocular: 100 cm
Diameter of working channel 1: oval, long axis: 1.6 mm, short axis: 1.2 mm
Diameter of working channel 2: 0.60 mm
Deflection one-way: 90°
Working channels with Luer-Lock connection at the proximal end of the handle

Cleaning:

Sterilizable in gas and soakable in disinfectant solution

Available instruments:

biopsy forceps oval: 0.8 mm and 1.0 mm
biopsy forceps alligator: 0.8 mm and 1.0 mm
cytology brush: 0.8 mm and 1.0 mm
stone basket: 0.8 mm and 1.0 mm
laser fiber
cleaning brushes: 0.36 mm - 0.55 mm, 1.2 mm - 1.8 mm
guide wire: 0.018", 0.022", 0.035"
